Allowable Subject Matter

1. Claims 1-14 are allowable over the prior art of records.
2. The instant application is deemed to be directed to an unobvious improvement over the invention patented in Pat. No. 6,178,477 and 6,546,476. The improvement features include the system and method of delivering a command in a bus system, including one or more master devices and two or more slave devices comprising the step of delivering a second command to a second slave device at a point in time which is less than or equal to a latency time of the second device in advance of the completion of the data transfer according to the first command (claims 1, 8); a pseudo delayer which includes a storing unit for storing a number of delay clock cycles which corresponding to respective differences between the longest of the latency times of all the slave devices and the latency time of each slave device, which receives a first command for first device from the master device and which delivers the first command to the first slave device after a number of delay clock cycles corresponding to the number stored in the storing unit for the first slave device has lapsed (claims 6,13).
3. The title of present application has been amended as follow:
 - Bus system for master-slave device accesses, has multiple pseudo-delayer connected to controllers which delay and output access commands to slave devices for having longer latency periods --
4. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferable **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
